How We Prioritize Opportunities

2026-08 · Higher Priority = stronger case for action

SEVERITY — 0–100

How large is the KPI problem?

Compared with the relevant SBU benchmark or operating target.

Evidence volume and confidence are considered. Larger reliable negative gaps create higher Severity.

Dominant-KPI protection keeps a major problem from being hidden by healthy KPIs.

IMPACT — 0–100

How much business exposure sits behind the problem?

Order-related exposure behind the KPI gap. Higher-volume problems generally create higher Impact.

Not euros. Not guaranteed recovered orders. Not a financial forecast.

PRIORITY — 0–100

Where should we act first?

Metric Priority =
KPI Severity × KPI Impact / 100

Store Priority combines eligible KPI-level priorities, with dominant-KPI protection so one major issue cannot be diluted.

PRIMARY ACTION KPI

The KPI with the strongest paired business case for action at that store.

BASE ACTION RULE · Priority ≥ 5.0

The 5.0 threshold remains provisional. V2.1 overrides can classify lower-score stores ACTION.

Priority ranks stores. Separate V2.1 triage assigns ACTION / MONITOR / HEALTHY / UNCLASSIFIED (six ACTION stores shown by default).

Missing evidence → incomplete assessment, not zero. Critical observations are reviewed separately from business Priority.

Exposure components may overlap; headline exposure uses the largest. An opportunity signal, not a recovery promise.

Uptime: 95% target; restoration exposure uses healthy history where available.

Benchmark: 2026-08. SBU peer composition is not available.

Priority Opportunities & Actions

2026-08 · V2.1 business triage · Priority ranking remains unchanged

No stores classified ACTION under the current V2.1 rules.

MONITOR, HEALTHY and UNCLASSIFIED remain separate.
